Innovation at the Intersection of Science,
Finance and Technology

Becoming the Global Leader in Systematic Investment Management

1

Problem

» Empirical data shows, discretionary fund managers are consistently underperforming their benchmarks while still charging high fees

2

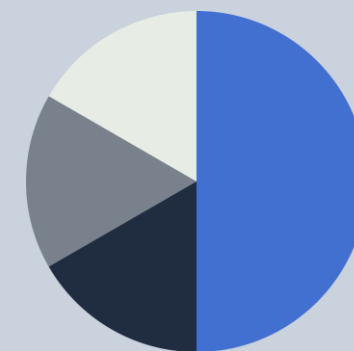

Solution

» We developed a new investment solution: **Systematic-Traded Funds (STFs)**
» **Go-To-Market Strategy:** Implementation via AIFs, SMAs, active ETFs or certificates

3

Traction

» Our Flagship STF (SPY3) achieved **+40% total return** since its inception in 2023
» Extensive backtests confirm consistent risk-adjusted outperformance

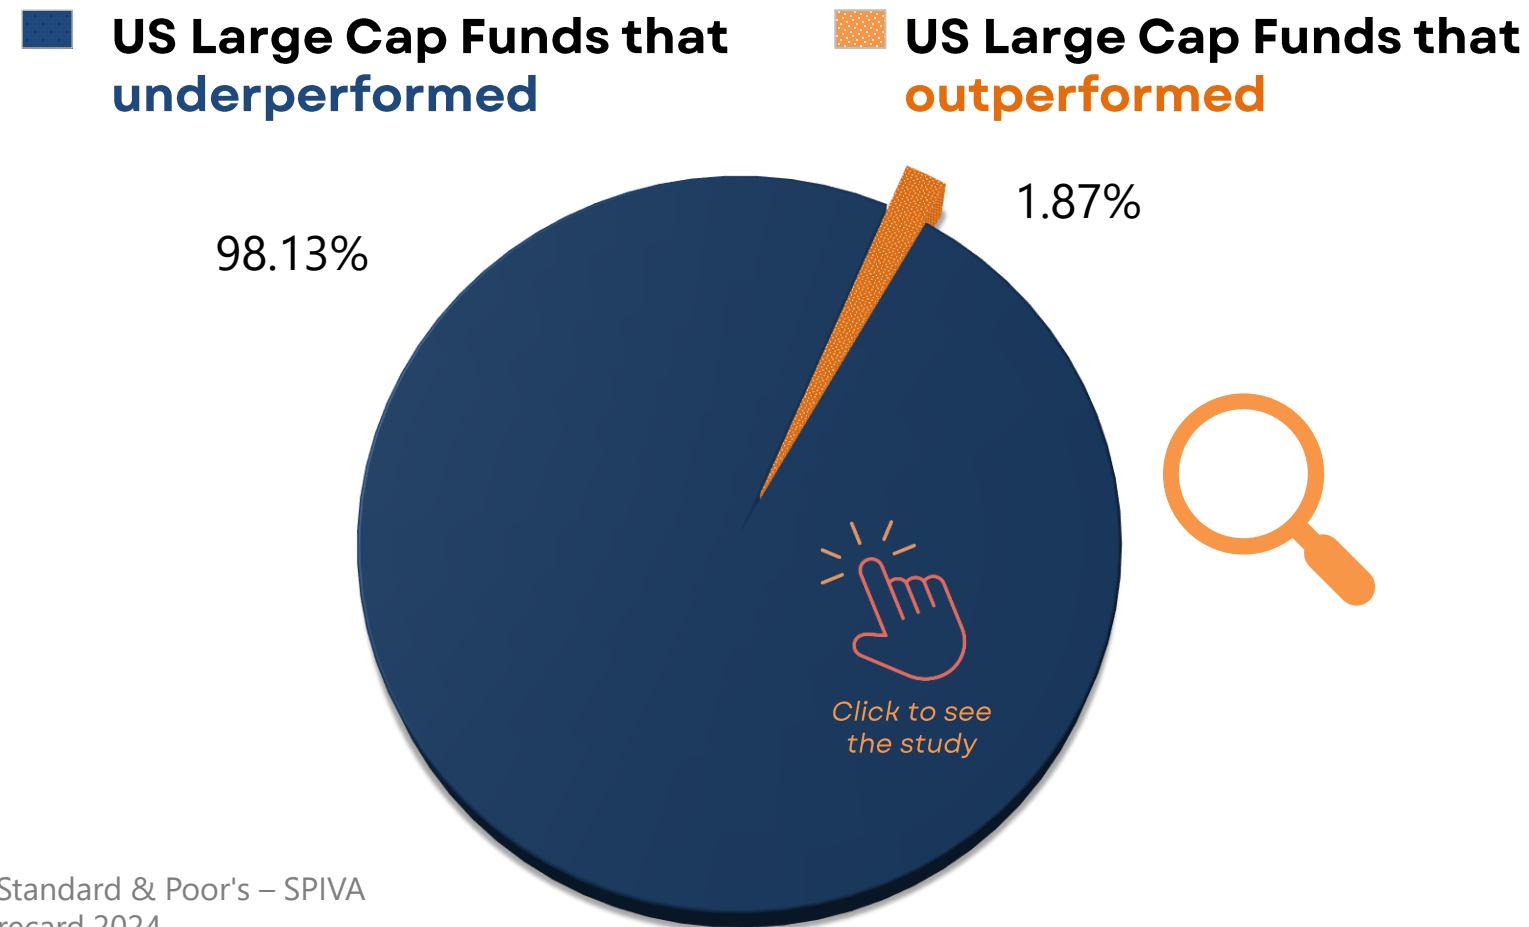

Overview of our target group

- Pension Funds
- Insurer
- Endowments, Family Offices
- Sovereign Wealth Funds

STFs Have Significant Advantages over Discretionary Approaches

Empirical Models

Our proprietary models use scientific insights from the fields of factor investing, distribution analysis and behavioral finance.

Transparent Decision-Making

Human errors and psychological biases are eliminated through quantitative data-driven decision-making.

Algorithmic Order Execution

STFs streamline trading, which minimizes costs while maximizing speed with real-time execution.

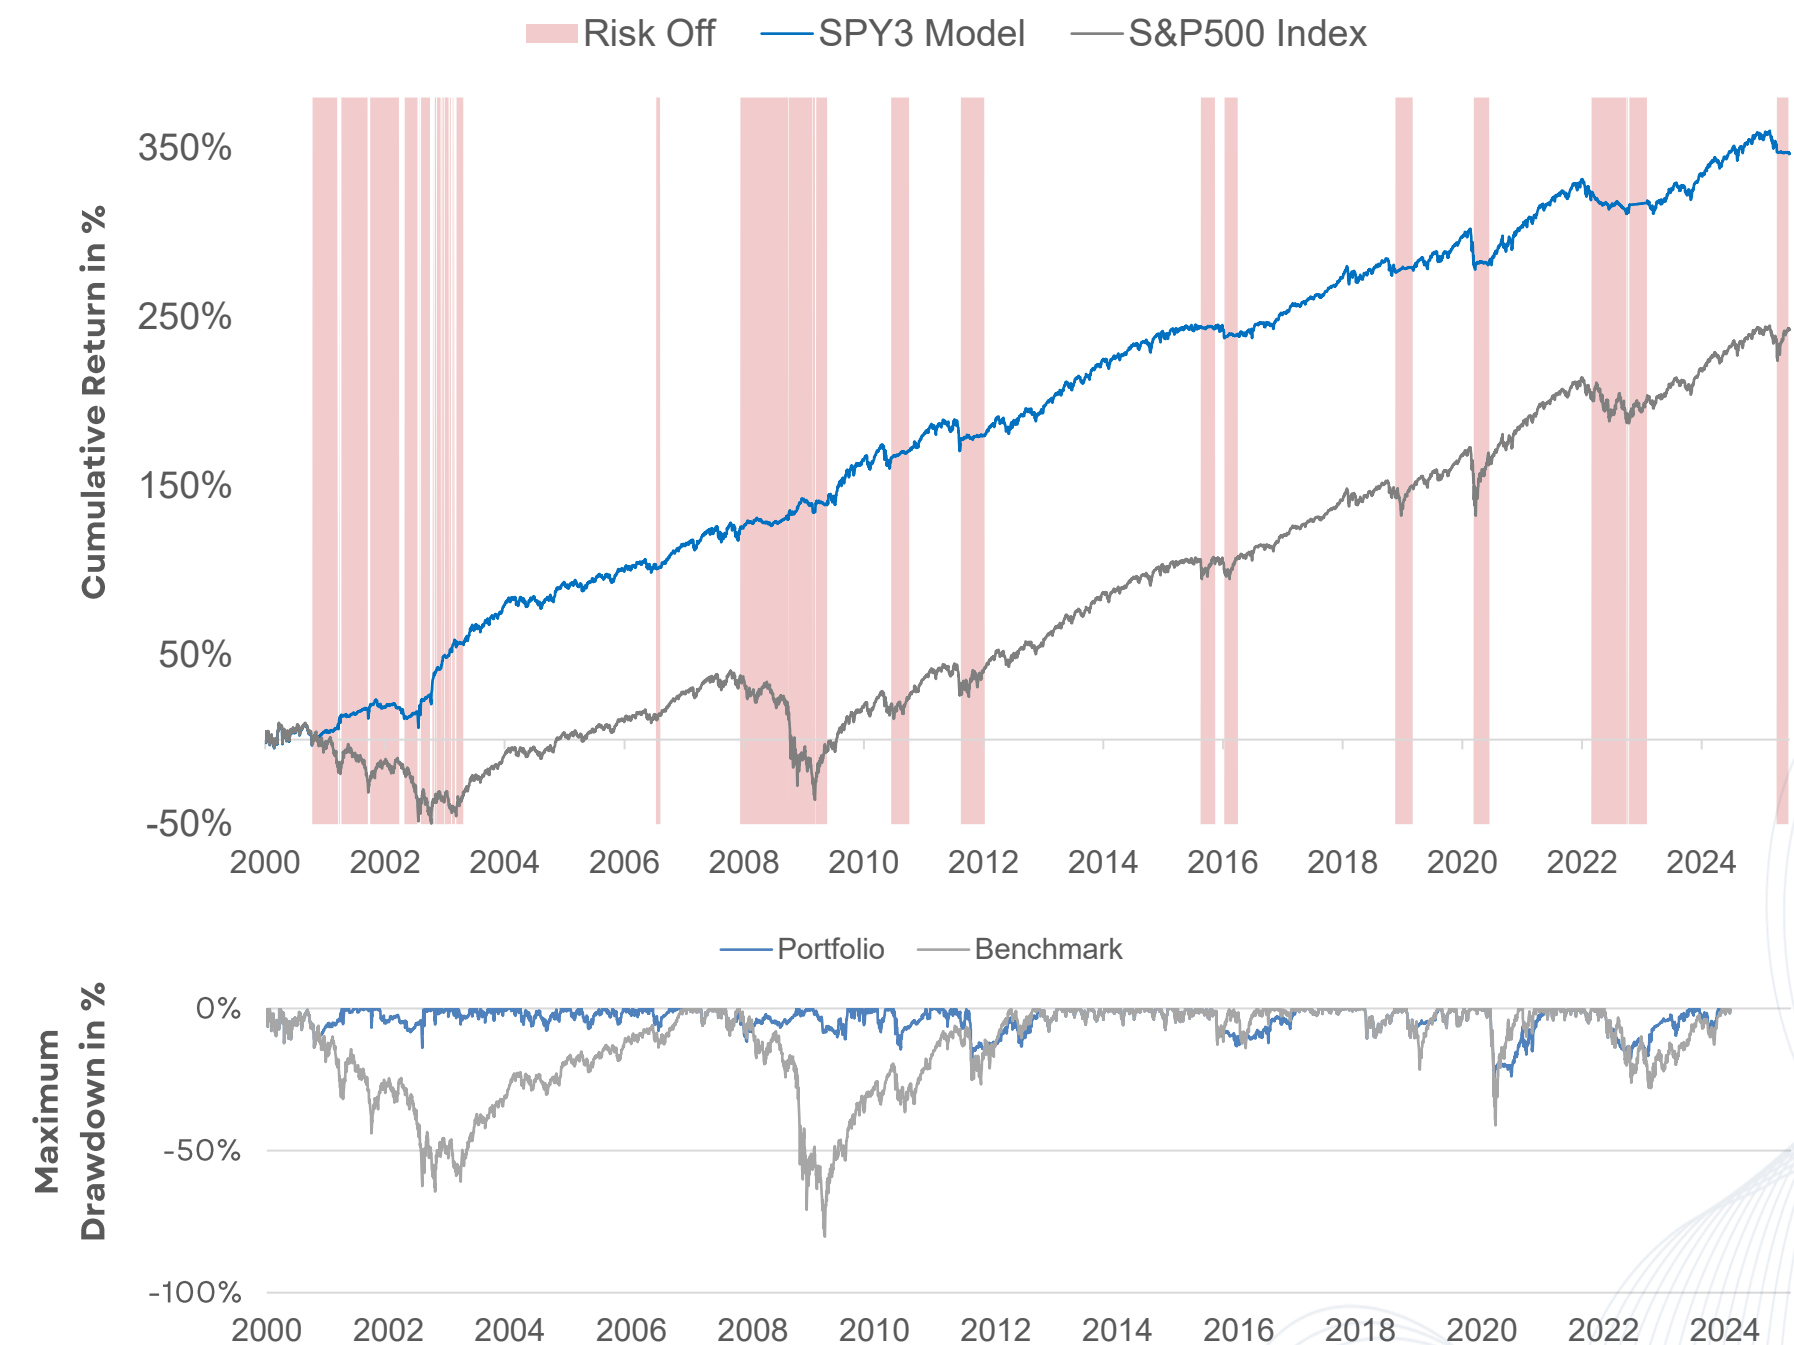

Cloud-Native Trading Infrastructure

Accessible software that can scale globally, designed to leverage economies of scale, while optimizing operational efficiency.
