Becoming the Global Leader in Systematic Investment Management

- 1 Problem**
 - » Empirical data reveals, discretionary public markets fund managers are consistently underperforming their benchmarks while still charging high fees
- 2 Solution**
 - » Invention of a new investment sub-class: **Systematic-Traded Funds (STFs)**
 - » **Go-To-Market Strategy:** Implementation via AIFs, SMAs, mutual funds or certificates
- 3 Traction**
 - » Our MVP (SPY3 STF) achieved **+40% total return** since its launch in 2023
 - » **Extensive backtesting** confirms consistent superior risk-adjusted returns over time
- 4 Competitive Edge**
 - » We outperform discretionary competitors by leveraging **proprietary quantitative models**, statistical insights, and an algorithmic execution infrastructure – eliminating behavioral biases with **real-time, data-driven decision-making**

98% of Active Fund Managers Are Not Worth Their Money

Systematic-Traded Funds (STFs): A Smarter Standard for Investing

Scientific Models

Our quantitative models leverage empirical insights from the fields of factor investing, distribution analysis and behavioral finance.

Transparent Decision-Making

Psychological biases and human errors are eliminated through systematic data-driven decision-making.

Algorithmic Order Execution

STFs streamline trading, which minimizes operational costs while maximizing speed through real-time execution.

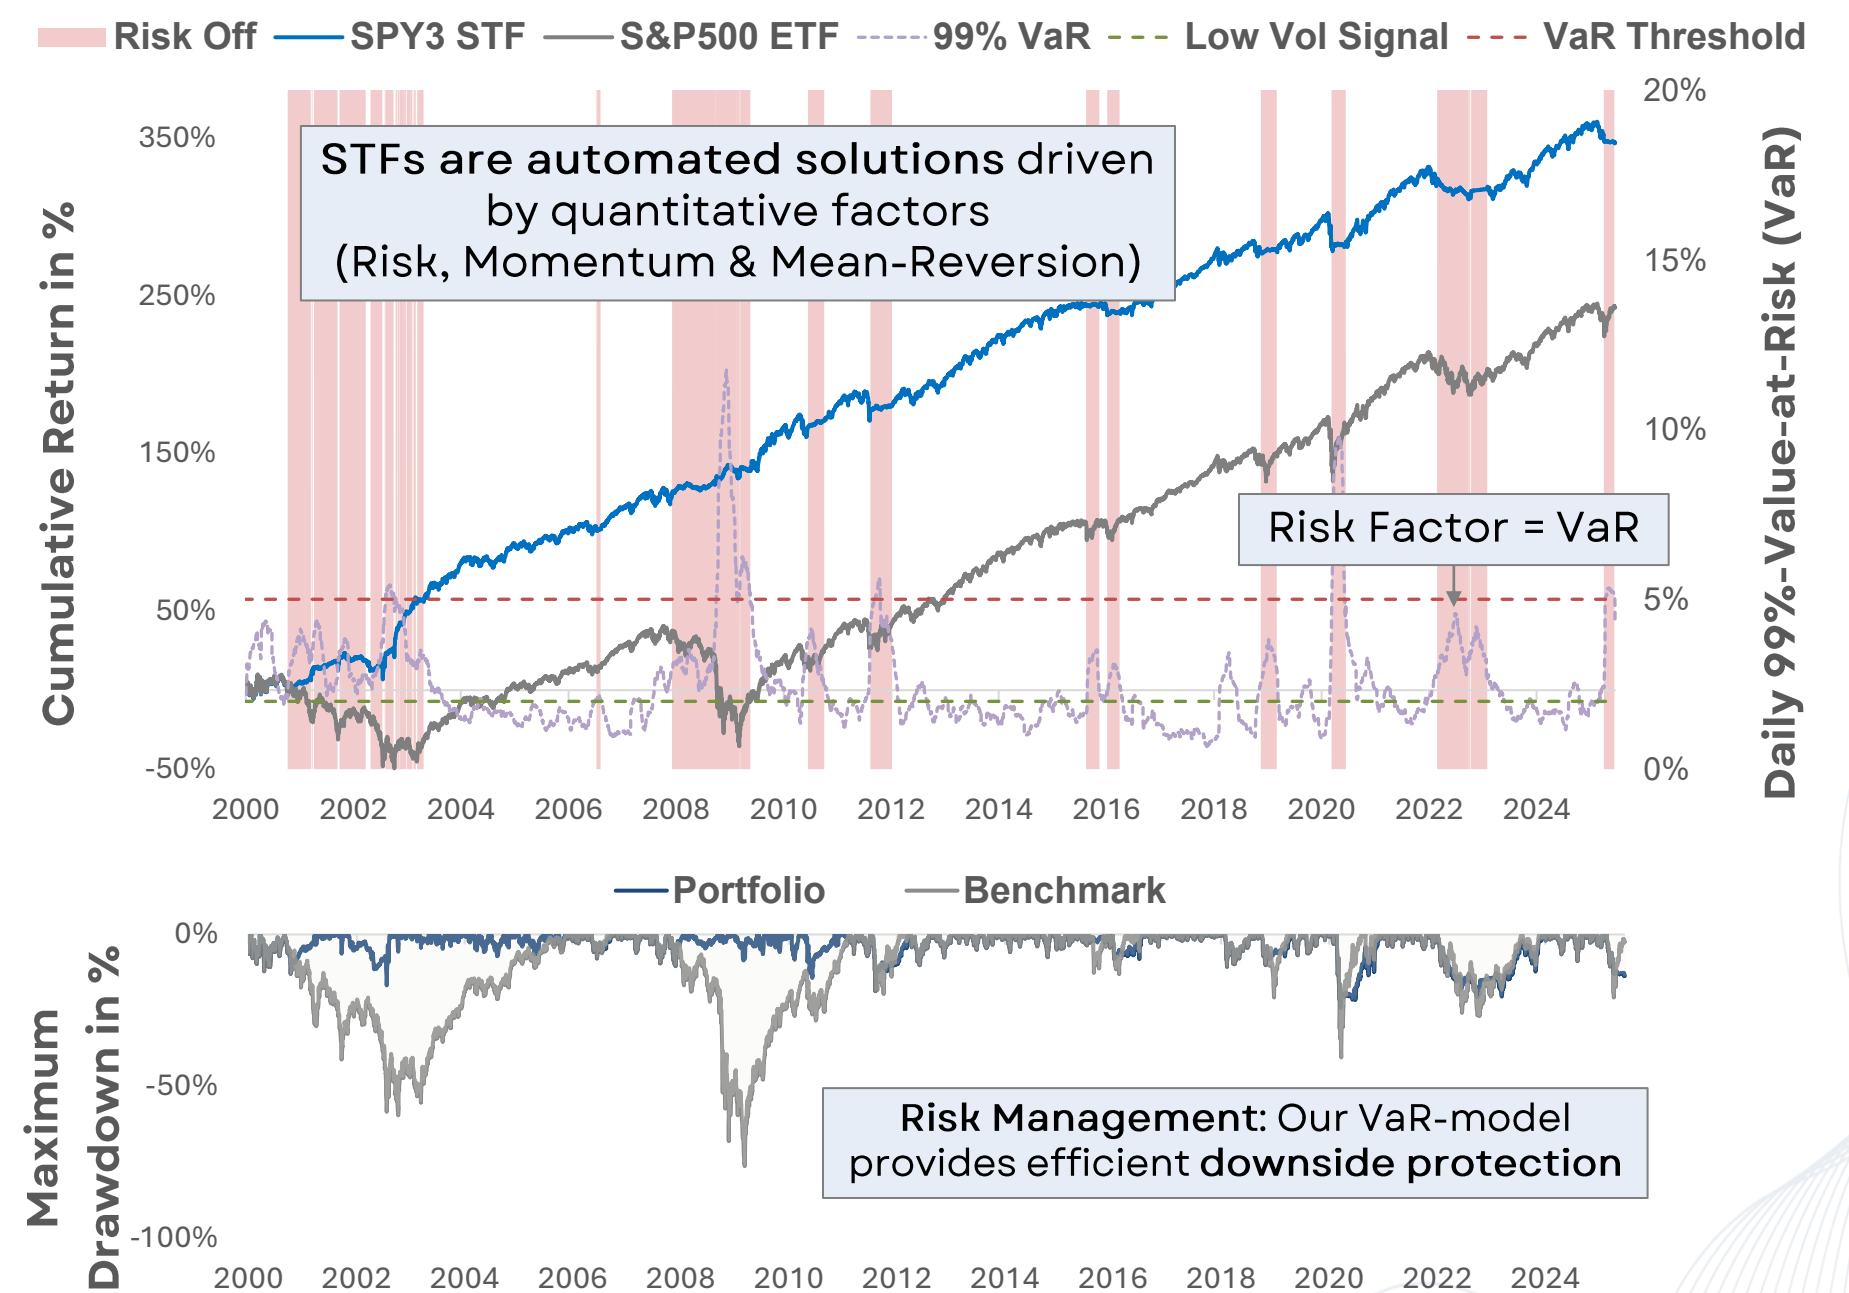

Cloud-Native Infrastructure

Accessible software that can scale globally, designed to leverage economies of scale, while optimizing efficiency.
