Innovation at the Intersection of Science,
Finance and Technology

Becoming the Global Leader in Systematic Investment Solutions

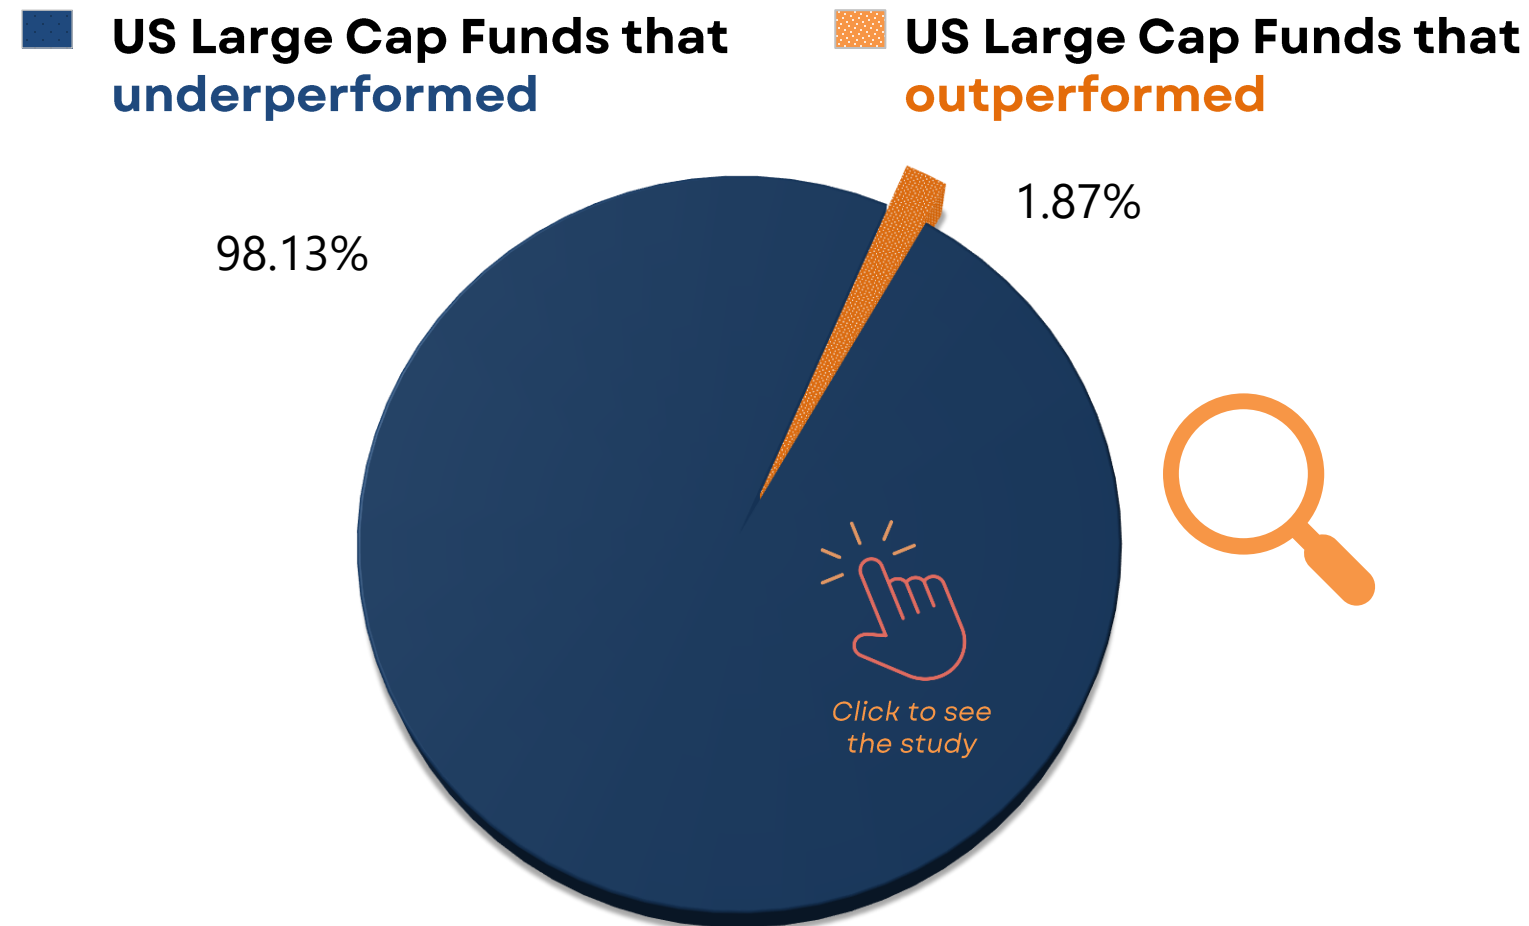

- 1 Unique Value Proposition**
 - » The invention of a new investment sub-class: **Systematic-Traded Funds (STFs)**
 - » Cost-efficient and automated solutions tailored to the needs of **Institutional Investors**
- 2 Market Size**
 - » Active Public Markets Fund Management amounted to 132tn USD in 2021, almost doubling from 78tn USD in 2015 – resulting in a **Multitrillion-dollar market**
 - » **Go-To-Market Strategy:** Implementation via AIFs, SMAs, active ETFs or certificates
- 3 Proven Results**
 - » SPY3 STF is publicly tradable with an **annualized return of +30%** since inception in 2023
 - » **Extensive backtesting** underpins consistent superior risk-adjusted returns over time
- 4 Competitive Edge**
 - » We outperform discretionary competitors through empirical insights¹ and our proprietary algorithmic execution infrastructure, that eliminates human errors and behavioral biases with real-time **data-driven decision-making**

98% of Active Managers Underperform And Still Charge Premium Fees

S&P SPIVA Report 2024: Active Funds vs. Benchmark

Risk-Adjusted Return over a 15 Years Periods (1/1/2009 – 12/31/2024)

Active fund managers deliver
negative alpha, with high fees

Systematic-Traded Funds: A Smarter Standard for Public Markets Investing

Systematic-Traded Funds (STFs) tackle the problem of **high costs, persistent underperformance, and lack of transparency** among active fund managers

Efficient
Execution

Better
Performance

STFs Have Systematic Advantages over Discretionary Investment Approaches

Empirical models

Our proprietary models use scientific insights from the fields of factor investing, distribution analysis and behavioral finance.

Transparent decision-making

Human errors and psychological biases are eliminated through quantitative data-driven decision-making.

Algorithmic order execution

STFs streamline trading, which minimizes costs while maximizing efficiency and speed.

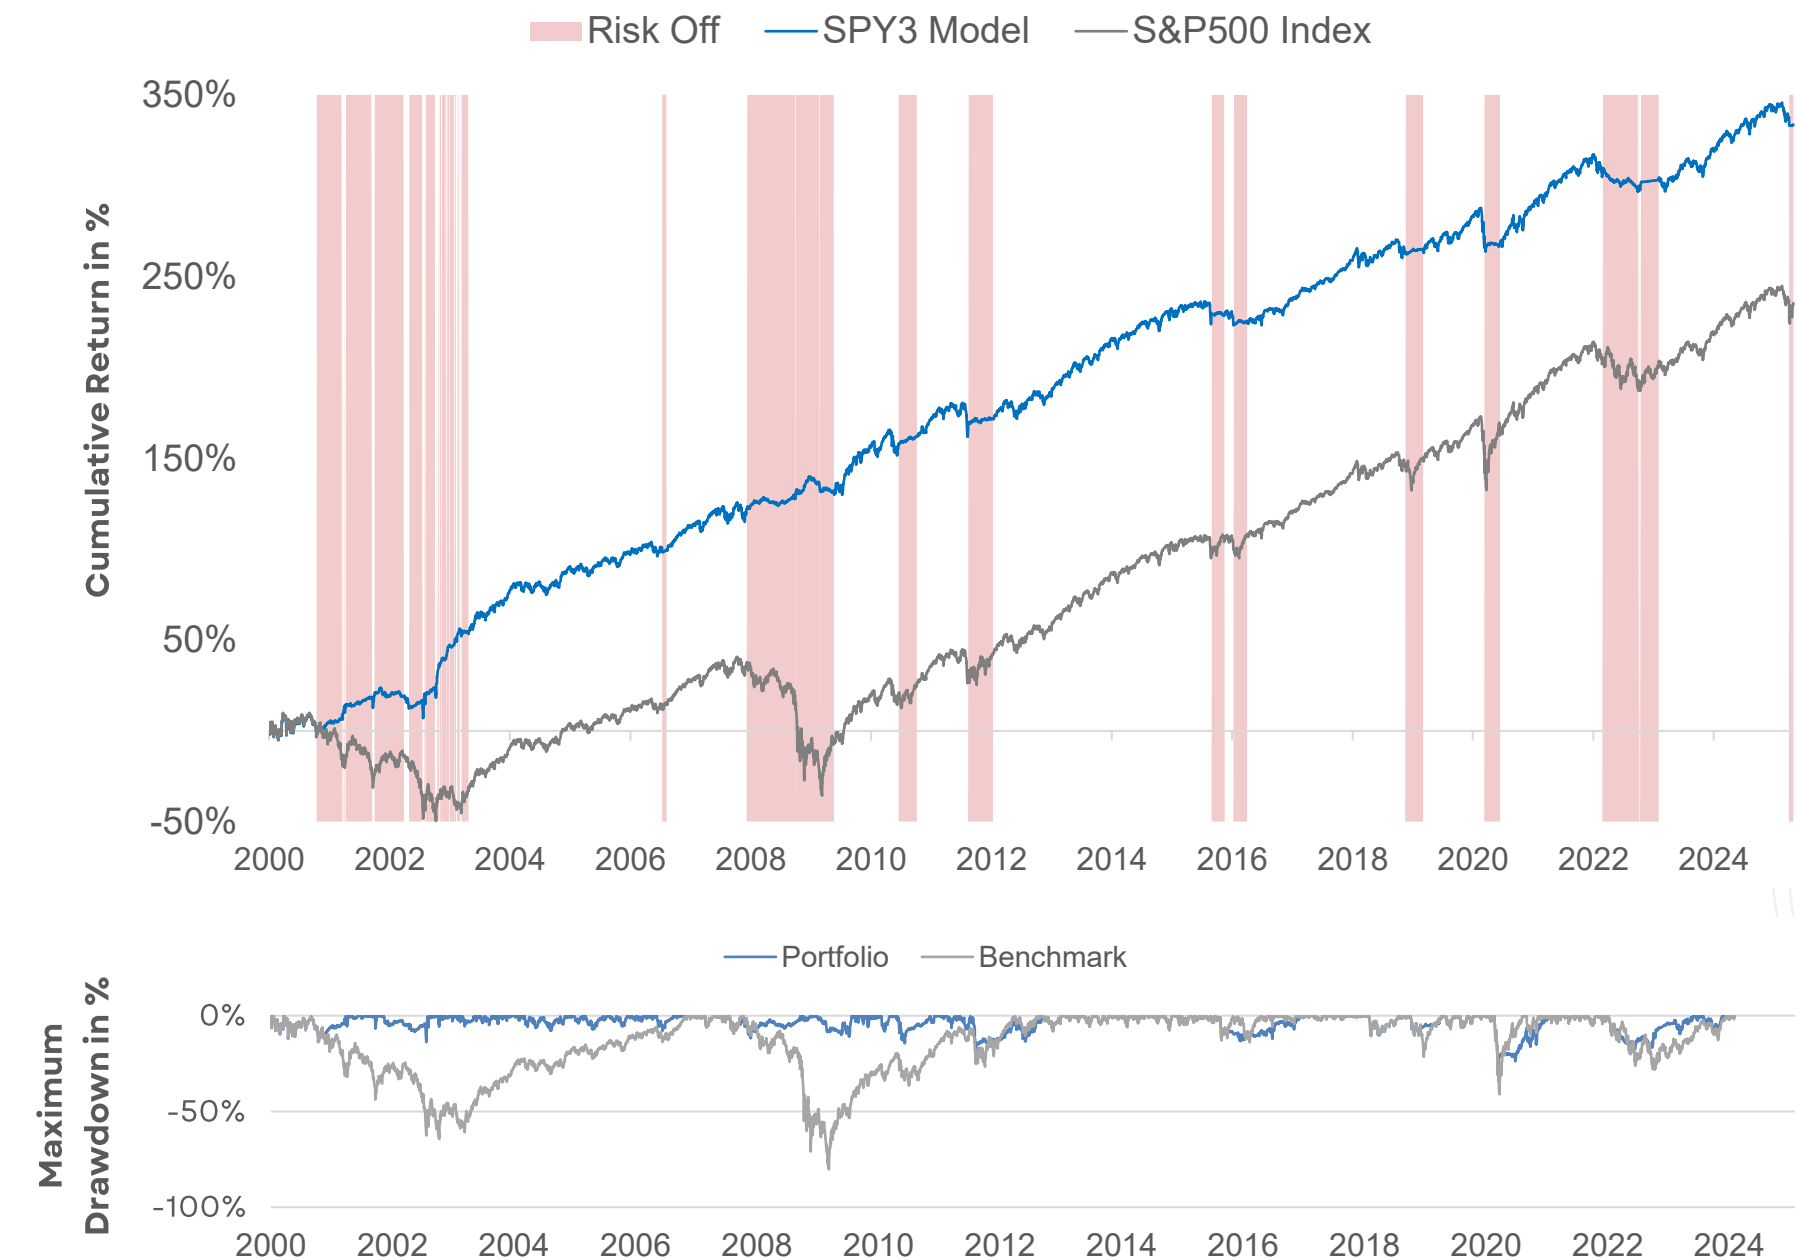

Cloud-native trading infrastructure

Accessible software that can scale globally, designed to leverage economies of scale, while optimizing operational efficiency.
